General Information Auto-restart after power loss

• The indoor unit shall be capable of being field convertible to downflow configuration with onal downflow conversion kit

outdoor unit shall have a snow accumulation prevention option setting to prevent w drifting against an idle outdoor unit.

indoor and outdoor units shall have a removable EEPROM that stores system gramming information, unit name, and other data

outdoor unit shall have a night time quiet mode option to reduce operating sound ng the night (automatic or manual activation with dry contact signal).

pipe connections at the outdoor unit shall be internal allowing pipes to inter the ssis through the front, right side, bottom, or back.

handler has an air leakage of no more than 2 percent of the design air flow rate when ed in accordance with ASHRAE 193.

outdoor unit shall supply power to indoor unit via 14 AWG X 3 power wire when onal heat kits are not installed. If VHK-***A supplemental heat kits are installed, power e heat kits must be provided from a dedicated circuit with proper overcurrent ection per NEC (refer to VHK-***A supporting documents for heat kit electrical data).

struction

outdoor unit shall be galvanized steel with a baked on powder coated finish for bility

indoor unit shall be constructed of insulated, powder coated, galvanized steel

or Fan

indoor fan is a double-inlet, forward curve, centrifugal type with a single constante (ECM) fan motor

The indoor unit shall have low, medium, high, and auto fan speed setting options.

The evaporator fan motor shall have five speed taps

Heat Exchanger

The indoor unit heat exchanger shall be mechanically bonded aluminum fin to copper tube

The outdoor unit heat exchanger shall be aluminum, flat fin, micro channel

Controls

Control signal shall be a DDC type signal

Interconnect control wire between outdoor and indoor unit shall be 16AWG X 2 shielded

Controllers must be purchased separately

Controls shall integrate with a BMS system

No additional interface modules/adapters are required when connecting to Samsung NASA DVM S central controllers

Refrigerant System

The refrigerant type shall be R410A

The compressor shall be hermetically sealed, inverter controlled, twin BLDC Rotary made by Samsung

Refrigerant flow shall be controlled by an electronic expansion valve at outdoor unit

Soft-start to reduce current demand during compressor start

Warrantv

10 Years compressor, 10 years parts, 1 year limited labor when registered (conditions apply)

SAMSUNG

Optional Accessories

Wired Controller	Advanced Wired Controller	MWR-WG00UN	
Wiled Controller	Simplified Touch Controller	MWR-SH11UN	
Wi-Fi Adapter		MIM-H04UN	
Wireless Signal	Wireless Signal Receiver	MRK-A10N	
Control	Wireless Controller	AR-EH03U	
External Temperature Sensor		MRW-TA	
External Contact Control		MIM-B14	
Filter Box (includes 1" MERV 8 filter)		VFB-3	
Supplemental	5kW	VHK-305A	
Electric Heat Kits	10kW	VHK-310A	
Wall Bracket (for outdoor unit)		CKN-250	
Wind Baffles	Front	WBF-1M2	
Wind Dames	Back	WBB-2M-B	
Line Sets - insulated and flared, interconnect cables included		25' - ILS2510	
		50' - ILS5010	
Downflow Conversion Kit		VDK-3	
Thermostat Adaptor (for connection to a standard 24VAC thermostat)		MIM-A60UN
