ENHANCED FEATURES BUILT WITH YOU IN MIND

Allied Commercial unit heaters meet a wide range of residential and commercial applications with natural gas or propane options.

Benefits Include:

- Efficient non-condensing unit heater-steady-state efficiency of up to 83%
- Tubular heat exchanger provides maximum performance
- Quieter space due to improved chassis, mounting grill, and fan components
- Horizontal and vertical wall venting options allow units to be placed in different locations
- 180 degree installation position capability allows for easy set-up and service, on LF25-030 thru LF25-105
- Simplified venting options

LF25 unit heaters offer backwards compatibility with all LF24 models.
