

Selling Packaged Units
to Homeowners

Make the expert's choice for quick
installation and proven performance.

AIREASE

AIREASE®

Built for life. Yours.

The packaged unit intentionally designed to be built for life. Yours.

Take advantage of AirEase's enduring craftsmanship, carefully placed components and proven performance and introduce your customers to the lifelong benefits of AirEase's new 14 EER packaged unit.

Designed for Hassle-Free Installation

AirEase® packaged units are designed to save time on every installation, so homeowners can get comfortable in no time.

- Standard pad size fits existing locations with minimal impact to homes, yards or rooftops.
- Righthand utilities provide easy access to gas and electric connections, minimizing installation costs and making your bids more competitive.
- Compact design fits in the back of a standard pickup truck for same-day purchase and delivery.

Servicing Made Simple

Maintenance on AirEase packaged units won't take all day.* Thanks to best-in-class Precision Service™ Technology, quick access to common service and repair components can help get units back to peak performance in no time.

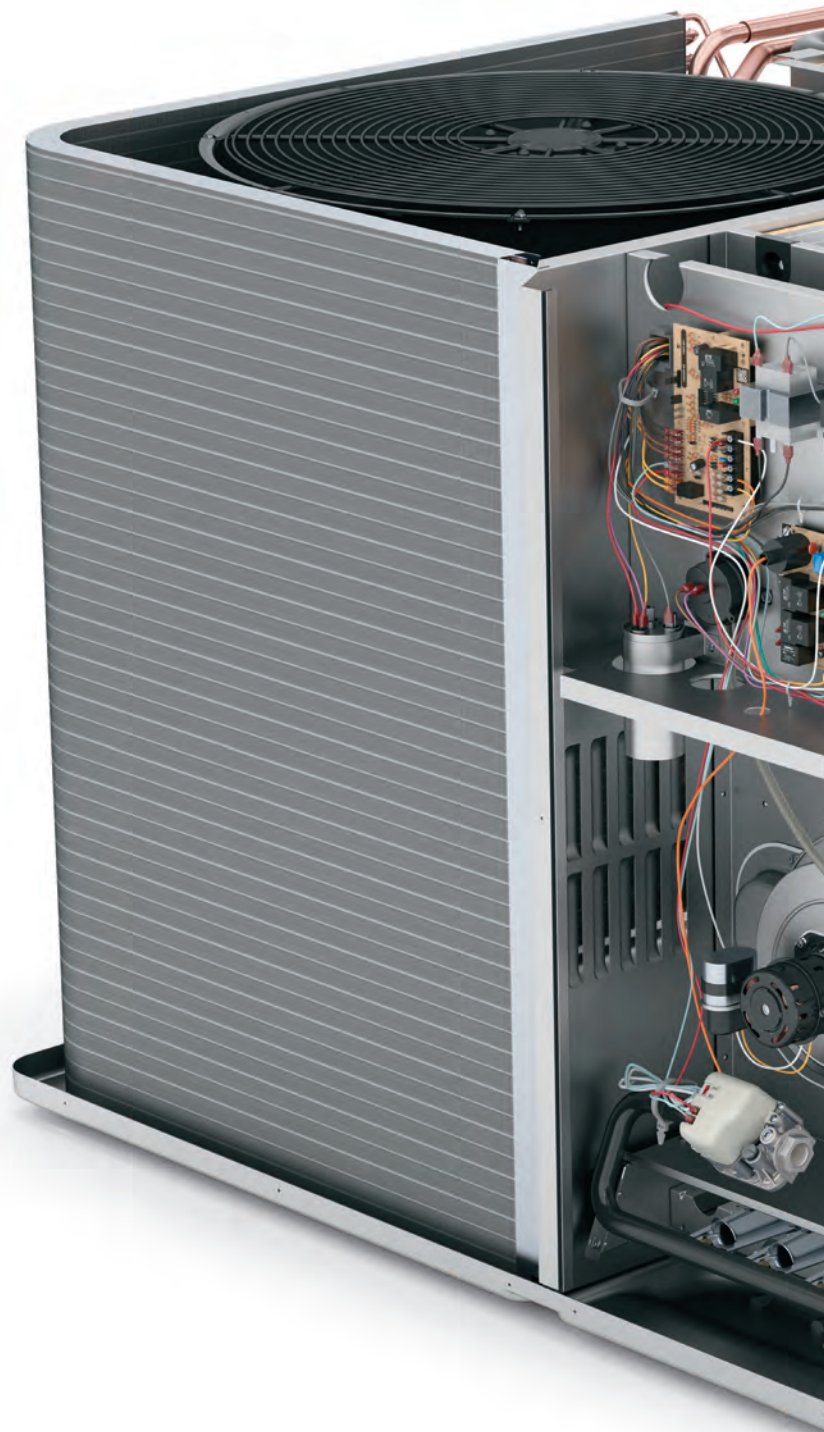

- Modular design allows you to easily disassemble the unit and put it back to its factory state.
- Easy access to key components allows for faster, more accurate diagnostics.
- A specific compartment for refrigeration components makes service tasks quick, easy and safer for technicians.

Don't forget to include a maintenance agreement to turn a single transaction into an ongoing one.

Lower Energy Bills

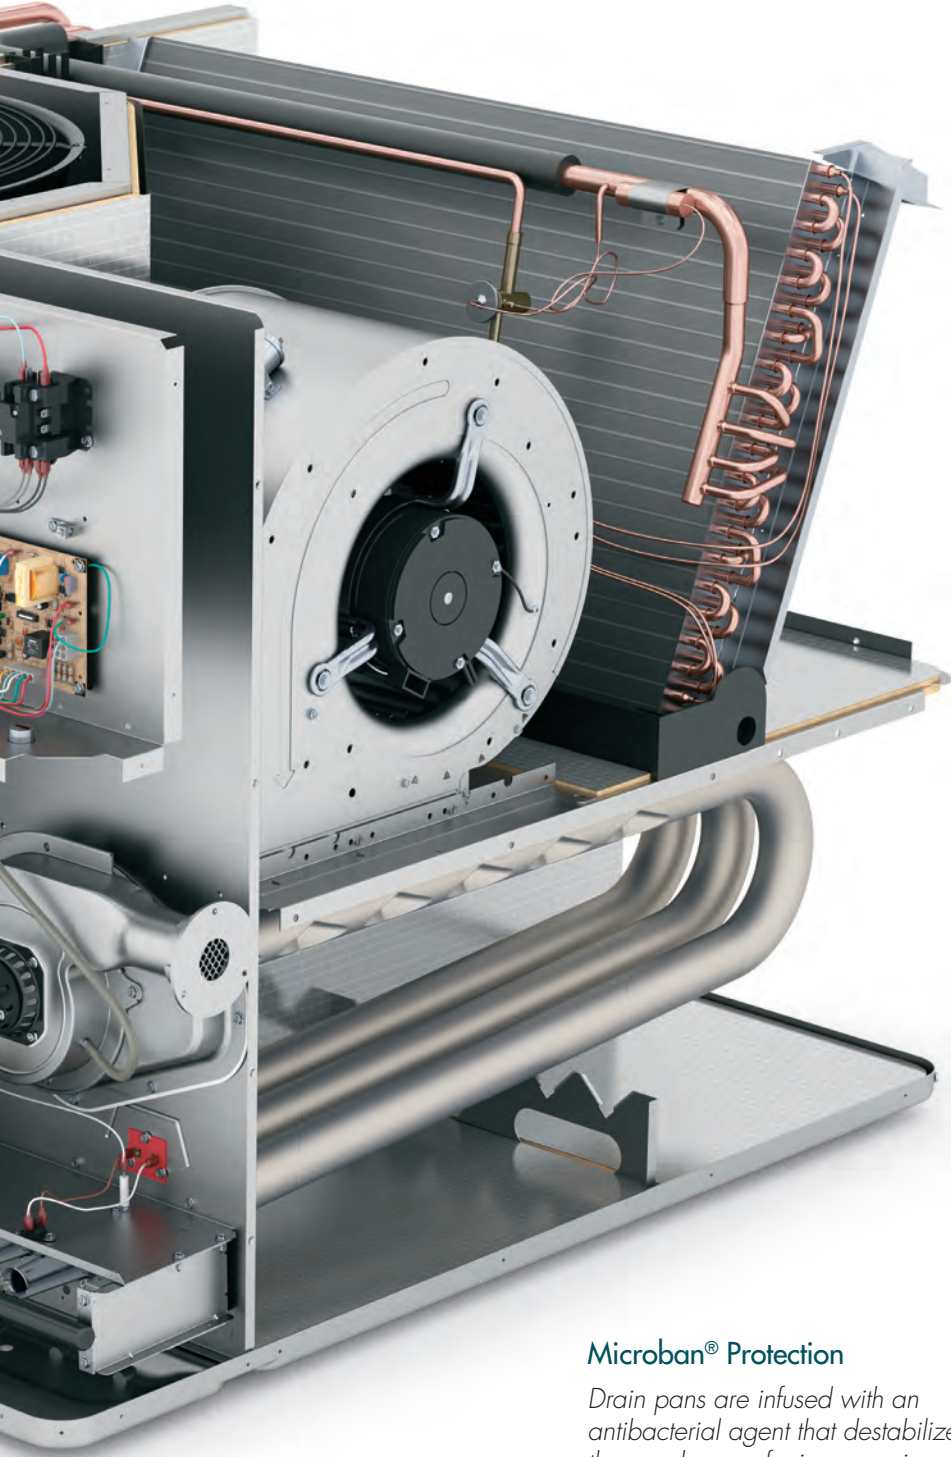

With efficiency ratings of up to 14.0 SEER, 8.0 HSPF and 81% AFUE, AirEase packaged units can potentially help homeowners save on energy costs all year long. That positions you as an experienced, trusted resource for heating and cooling needs.

*Actual maintenance may vary depending on site and servicing requirements.

Delivering many advantages—

AirEase packaged units are equipped with advanced features and quality materials designed to last.

Maximum Heat Exchange

Gas/Electric and Dual-Fuel packaged units feature a unique Tri-Diamond design that increases the heat exchanger's surface area, making heat transfer more efficient. This allows for a smaller heat exchanger that requires less energy to operate.

Reliable Start Every Season

By tilting the heat exchanger, the Tri-Diamond™ design eliminates issues caused by condensation developed during the cooling season. As a result, AirEase packaged units start up when they're supposed to, eliminating frantic last-minute service calls.

Enduring Craftsmanship

With most packaged units, the exhaust and the fresh air intake are placed next to each other, often resulting in the recirculation of dirty air. AirEase's design doesn't require a fresh air intake at all, reducing corrosion due to recirculation.

MHT™ Proven Performance

A specially crafted fan shroud, along with rifled tubing and lanced coil fin increase surface contact and maximize heat transfer. MHT Technology lets your customers enjoy cooler summers with lower utility bills.

Microban® Protection

Drain pans are infused with an antibacterial agent that destabilizes the membrane of microorganism cells, disrupting the cellular function of odor-causing mold and bacteria so they can no longer grow or reproduce.

Built-In Pest Control

Even during the off-season, AirEase packaged units flush out their heatin components. This creates an inhospitable environment for birds, rodents and insects, keeping them from nesting inside.

AirEase[®] packaged units that will win the trust of any homeowner.

When you're looking to provide an expert recommendation, look no further than the AirEase packaged units. They are the efficient, all-in-one solution preferred by those who know heating and cooling best. For proven performance and quick installation, choose the packaged unit **BUILT FOR LIFE. YOURS.**
