
COMFORT SYNC™
Programmable
Communicating
Wi-Fi Thermostat
72
Technologically advanced.
Conveniently connected.
AIREASE®
Built for life. Yours.

Comfort Sync™ gives you technologically advanced features that encourage upsell.

Simplified Installation

Advanced features allow you to select airflow, setpoints and other parameters easily with the fastest setup in the industry.

Four-wire Connections:
Reduces installation time and the need to pull new wire.

Auto Setup:
*Detects communicating equipment and automatically sets a customizable baseline configuration to speed up the commissioning process.**

Auto Commissioning:
Tests and modifies individual functions of the system on the thermostat, instead of cycling through the normal time delays. Adjust the dual-fuel balance points, fan-only times, delays, CFM adjustments and more settings at the thermostat rather than on the unit.

Alerts

Standard and customizable alerts are displayed in plain English, to help you and your customers keep equipment in peak performance.

–A critical alert identifies a problem that could prevent the system from working properly, and if allowed to run, could cause damage to the system.

–A service alert indicates routine service must be performed to equipment or any IAQ products. Custom alert events can be added for any application.

Real-Time Notifications:
You and your customers can receive email notifications as alerts happen

Free Automatic Software Updates:
Comfort Sync performs system updates automatically and wirelessly, without making extra work for you.

Integrated Hardware:
Comfort Sync comes with a built-in Wi-Fi receiver and equipment interface module, so there is no external hardware necessary. Every communicating outdoor unit has a built-in outdoor temperature sensor, saving installation time.

Communicating Equipment:
A97MV, A802V, BCS2V, 4SCU16LT, 4SCU18LT, 4SHP16LT and 4SHP18LT models

*Only the indoor unit is required to be communicating to utilize these features.

Advanced features, performance and opportunity.

Remote Access:

Homeowners can set and monitor system performance from anywhere in the world through an Apple® or Android™ app. Enhanced remote functionality can be accessed by logging on to **www.mycomfortsync.com** *to modify system programming.*

Live Weather Data:

Comfort Sync provides a five-day weather forecast and real-time weather alerts from AccuWeather, so homeowners know what to expect as they leave the house. The location is determined by the zip code entered when the thermostat is registered at **www.mycomfortsync.com.**

Energy Savings:

One-Touch Away Mode makes saving energy simpler. With just a touch of the screen, Comfort Sync goes into an energy-saving reduced-operation mode so homeowners don't heat or cool an empty home. Away Mode can also be controlled via remote access.

Easily Programmed:

Comfort Sync allows for up to four events in one day, and each day can be set up differently. System performance and energy savings can be optimized to match each homeowner's lifestyle.

Get more performance from everything you sell.

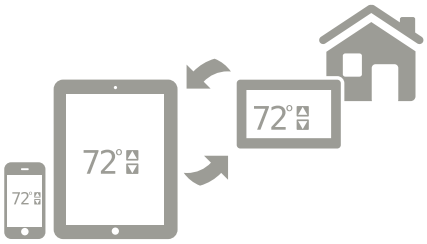

PRECISE PERFORMANCE

Comfort Sync™ has technologically advanced features that make homeowners feel more in control. But Comfort Sync is also a sophisticated tool to help you sell service plans, increase profitability and stay easily connected to your customers. Comfort Sync gives homeowners not just a thermostat, but a control that gets more efficiency and performance out of their equipment. It's an opportunity they won't want to miss. The opportunity to enhance your bottom line is one you won't want to miss, either.

- Easy programming and use
- Energy savings
- Live weather forecasts
- Real-time service alerts and reminders via email
- Easy access through the mycomfortsync.com dashboard
- Customizable appearance
- Plain English diagnostics

REMOTE ACCESS

Allows homeowners to check and adjust their home's temperature from anywhere using a laptop, smartphone, tablet or other web-enabled device.

COMFORT SYNC FITS IN ANYWHERE, AND LOOKS GOOD DOING IT.

Comfort Sync is as stylish as it is full-featured. Homeowners can order customized skins designed specifically for Comfort Sync that allow it to blend in seamlessly with any décor. Skins can even be created using the homeowner's own designs and photos.

Comfort Sync offers more to you and the products you sell.

When you choose to offer Comfort Sync to your customers, you're choosing to offer them a better-performing product. You're choosing to give them more for their money, along with all the technological advantages that only AirEase™ can offer. **Because it's BUILT FOR LIFE. YOURS.**
