Dafco
Filtration Group®

PRODUCT OVERVIEW

- Optimum Efficiency
  Highest level of efficiency
- Reinforced Scrim Backing
  Zero fiber migration
- Downdraft Diffusion Media
  Laminar airflow
- Progressive Density Media
  Excellent dust holding
- UL 900 Class 1 Rating
  Self extinguishing
- Self Sealing Panel
  Eliminates air by-pass

DIFF - DD PANEL

WHY A DIFF - DD PANEL ?

- Provides the ultimate intake protection. The pre-filter is as synthetic pad trapping larger particulate and protecting the final filter. The secondary filter features a progressively structured media with an adhesive dust binder to trap and hold dirt even in a vibration environment.
- The air existing side of the Diff-DD Panel consists of a reinforced scrim backing to guarantee zero fiber migration of particultes down to 5 micron and create a laminar flow in the spray booth.
- The media is heat sealed around a wire grid for support.

DIFF - DD PANEL

DIMENSIONS

SIZE	PART NUMBER	CASE QUANTITY
10 x 20	18728	24
12 x 24	18853	24
16 x 20	18854	24
16 x 25	16857	24
***20 x 20**	**16958**	**24**
***20 x 25**	**16959**	**24**
24 x 24	**16962**	24
20 x 46	18729	8
***20 x 48**	**16960**	**8**

*Indicates Standard Stocked Size.
