WHAT GOES INTO OUR GLOVES

Designs

Gunn Cut	This durable design provides better wear and comfort, especially for heavier gloves. This is the standard construction for leather gloves, featuring the benefits of a single piece seamless back and the finer seams set further away from the working area of the palm.
Clute Cut	This comfortable glove style keeps the palm free of stitching. The palm and all four fingers are cut from one piece of leather and on the back side, each finger is a separate piece of leather.
Wing Thumb	The angled construction allows good flexibility with no seams on the palm side to obstruct work or cause fatigue.
Straight Thumb	A glove thumb that normally lies straight with the index finger.
Welted Seams	A thin piece of leather sewn into the seam to strengthen it and protect from sparks. Often a welt is used in the seam at the crotch of the thumb and the base of the fingers.
Kevlar®	Kevlar® is five times stronger than steel, yet, it is lightweight, flexible and comfortable. It is resistant to chemicals, heat, flames, cuts and breaking. Kevlar® thread is used in many of the Watson glove styles.
Gauntlet	A longer cuff to protect the forearms. Standard length is 5".
Leather Gore	Triangular piece of leather added to gauntlet cuffs to accommodate covering clothing.
Thumb Strap	Leather reinforcement added to the thumb crotch area of the glove to protect this critical wear area.
Pulse Protector	Leather reinforcement added for protection to the inside wrist area of the glove.

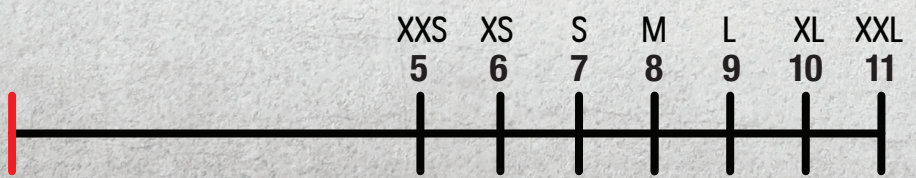

Leather

Elk Hide	A superior strength leather, durable and tough, yet supple. This leather maintains its softness after drying.
Deerskin	This highly flexible leather is soft, but strong. It is regarded as the best leather for gloves in industries where dexterity is important, such as arc and TIG welding.
Goatskin	This premium leather is hard wearing, durable and supple because of the natural lanolin produced by goats. It is highly recommended for applications requiring tactile sensitivity with light to medium protective needs.
Cowhide	This leather strikes a good balance of durability, dexterity, abrasion resistance, and comfort. It can have a smooth or rough finish.
Full-grain	The outer, smooth surface of the hide. Provides a superior wear resistance compared to split leather.
Split-grain	Suede layer cut from meat side of thicker skins, a consistently durable grade leather.
Re-tan	The process of tanning a second time to create a stiff, durable leather.
Aluminized	A thin film of aluminum is bonded to the leather giving it a heat reflective quality.

Linings

3M Thinsulate™	Designed by 3M, Thinsulate™ is regarded as state of the art technology in insulation. The fibres are fine, making them ideal for trapping insulating air and reflecting back the body's radiant heat. Thinsulate™ insulation provides more warmth with less bulk.
Foam	Polyurethane foam core with a cotton fleece overlay, provides moderate quick drying and comfortable insulation.
Fleece	A lightweight 100% cotton, combed to provide insulation and excellent dexterity.
Refrasil®	Silica-based woven textile product that is specifically designed for high temperature use.

WATSON GLOVES Quality since 1918

NOTES

WATSON GLOVES®
Quality since 1918

Our Story

Watson in a Nutshell

With a century of experience, Watson Gloves is Canada's single source for hand protection at work, at home, at play. Our team of glove specialists gets tremendous satisfaction from working with our customers to find the perfect hand protection for just about any task imaginable. Whether we source our gloves from the world's finest manufacturers, or hand-craft them in our local factory, every pair of gloves we sell has been selected for top-of-the-line materials, design and craftsmanship. Try on a pair of Watson gloves. Your hands will thank you!

2 Man Show to International Operation

In April 1918, John Watson and Wayne Stanley started a small business selling hand-crafted gloves to Vancouver's dock workers. Today, 101 years later, Watson Gloves has grown across Canada. We are among the country's leaders of distributing hand protection; offering the widest range of quality gloves for work, home and play.

How did we get here? We have stayed true to our founders' belief that quality materials and above-and-beyond customer service go hand-in-glove. We still make gloves. In fact, our artisans – with an average 20 years' experience – put the same level of dedication and craftsmanship into every pair of gloves we make, as did our founders.

Perhaps more importantly, we have expanded our horizons to keep up with our customers' changing needs. Our talented buyers travel the world over in search of the most innovative materials and designs so that we can offer the best gloves for any task: at work, at home, at play. From bustling cities to remote corners of our country and countries across the Atlantic, our team of sales reps and efficient distribution system make it easy to protect the hands of our customers.

At Watson Gloves, we do one thing, and we do it extremely well: we are the glove experts. Mr. Watson and Mr. Stanley would be proud to know that, even as we continue to grow, we continue to earn our reputation as Canada's single source for hand protection.

Our Commitment

At Watson Gloves, quality materials and above-and-beyond customer service go hand-in-glove. You can count on Watson for:

Quality Every pair of gloves we sell has been hand-selected for top-of-the-line materials, design, and craftsmanship.

Service with a Smile Our experienced team of specialists is committed to our customers' complete satisfaction with each and every pair of Watson gloves purchased.

Innovation We commit to staying one step ahead of our customers; anticipating their needs and bringing the most advanced gloves for just about any job imaginable.
