testo 552 - Digital vacuum/ micron gauge with Bluetooth

- Precise and reliable vacuum measurements, 1 micron resolution
- Displays the saturation temperature of H2O to ensure full and proper evacuation
- Illuminated, backlit display with visual alarm for evacuation pressure

Part no: 0560-5522-01-TES

testo 410i - Vane anemometer wireless Smart Probe

- Measures air velocity, volume flow, and temperature, as well as air flow at registers, and automatically calculates volume flow
- No air density correction required, due to its design
- Timed/multipoint averaging to get accurate air flow profiles

Part no: 0560-1410-01-TES

testo 405i - Hot-wire anemometer wireless Smart Probe

- Measures air velocity, volume flow, and temperature
- Measures in-duct air flow, and automatically calculates volume flow
- Small diameter (<0.5") and 15" telescopic shaft length Perform air duct leakage tests

Part no: 0560-1405-01-TES

testo 510i - Differential pressure manometer wireless Smart Probe

- Measures static pressure, air flow, and volume flow (pitot tube not included)
- Measures manifold pressure and pressure drop across filters and coils
- Easy configuration and calculations for volume flow

Part no: 0560-1510-01-TES

testo 316-3 - Refrigerant Leak Detector

- Patented heated diode sensor provides excellent sensitivity
- High/low sensitivity adjustment and automatic zeroing
- Easy one button operation

Part no: 0563-3163-TES

testo 550 digital manifold kit - with Bluetooth® and set of 3 hoses

- Complete Kit: set of 3 hoses, 2 x pipe clamp temperature probes and transport case
- Automatic calculation of superheating/subcooling for 60 refrigerants: no hassle of manual calculations
- Connection to smartphone/tablet Refrigeration App

Part no: 0563-2550-TES

testo Smart Probes AC & Refrigeration Test & Load kit

- Application-specific measurement menus for superheating/subcooling, target superheat, heating/cooling power
- More than 90 common refrigerants plus refrigerant updates in the testo Smart Probes App
- 350 ft Bluetooth® range for particularly flexible applications
- Transmission and analysis of measurement data via testo Smart Probes App

Part no: 0563-0009-TES

testo 570 - 4-Valve digital manifold kit with data logging

The testo 570 4-valve digital manifold has an internal vacuum sensor, data logging and printing capabilities, and an additional third probe port for either ambient temperature, current, or oil pressure probes.

- Internal vacuum sensor
- Data logging and printing capabilities
- 999 hours of data for further evaluation on your PC
- Includes 2 temperature clamp probes, USB cable, and carry case

Part no: 0563-5703-TES

testo 310 - Residential combustion analyzer kit with printer

- Wireless printer with integrated magnets for professional jobsite documentation
- All the measurements you need, including draft and pressure
- Fast 30-second startup so you can get testing quickly

Part no: 0563-3110-01-TES

testo 300 Combustion Analyzer Residential / Commercial

- Fast and easy to operate: intuitive measurement menus and fast-response Smart-Touch display
- Includes O2 and CO Sensor (CO Sensor range 0-4,000ppm)
- Large 5-inch Smart-Touch HD display – see all the system's measurements at a glance
- Ready to measure at the touch of a button from standby mode

Part no: 0564-3002-82-TES
