

M-SERIES™  
**MCE4-11**

ELECTRIC COOLING /  
ELECTRIC HEATING  
PACKAGED UNIT

FORM NO. MCE4-100 (01/2021)

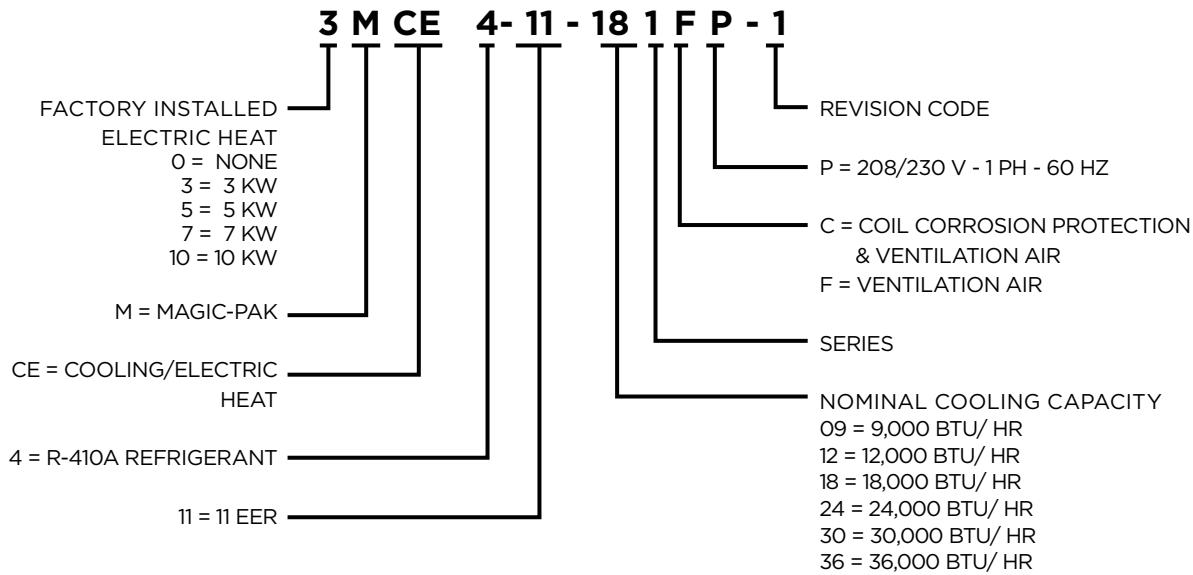

Single Package Vertical AC  
AHRI Standard 390

Single Package Vertical AC  
AHRI Standard 390

## MODEL NUMBER GUIDE

\* Check that equipment complies with all applicable building codes, laws, and regulations for its intended use prior to installation.

## APPLICATIONS

- Magic-Pak units are designed for use in all multifamily residential and commercial applications, such as: apartments, condominiums, student housing and senior living
- Installation in conditioned and non-conditioned mechanical spaces

## UNIT APPROVALS

### ETL (INTERTEK)

- Design certified by ETL Intertek to latest edition of UL 1995
- Certified for the U.S. and Canada
- Certified for less than 1.4% cabinet air leakage using ASHRAE Standard 193
- Factory-installed electric heaters are ETL listed for the U.S. and Canada
- Rated and tested in accordance with DOE test procedures and Federal Trade Commission (FTC) labeling regulations
- Rated with a 5kA Short Circuit Current Rating (SCCR) in accordance with RMS Symmetrical per UL 508A
- Refer to Unit Electrical and Physical Data table for additional details

### AHRI/DOE

- Certified to AHRI Standard 390 for single package vertical units (SPVAC); refer to the AHRI Directory for AHRI certificates
- Cooling system rated in accordance with Department of Energy (DOE) test procedures

### CORROSION PROTECTION

- Coating is specifically designed for use on HVAC type coils and demonstrates 6800+ hours of Sea Water Acetic Acid Testing (SWAAT) per ASTM G85:A3

### SOUND RATING

- Outdoor sound level measurements tested per ANSI/AHRI Standard 270
- Refer to Outdoor Sound Rating & Cabinet Air Leakage table for additional details

### LOUVER - PAINT SPECS

- Standard and impact-resistant louvers meet AAMA 2605 specifications

## WARRANTY

### (RESIDENTIAL AND COMMERCIAL)

#### COMPRESSOR

- Five (5) years limited parts warranty

#### ALL OTHER COVERED COMPONENTS

- Refer to Equipment Limited Warranty for additional details

## STANDARD FEATURES

### AIRFLOW CHOICE

- Factory shipped ready for top supply and return duct connections
- Field-adaptable free return configuration, which may utilize the top or the front as return points
- Front access panel doubles as cover for top return (except 3.0 ton)

### ELECTRICAL CONNECTIONS & GAUGE PORTS

- Line voltage knockouts (two concentric) to accommodate field required wire size
- Thermostat connections are located at the top of the cabinet
- Two gauge ports are located within the lower compartment of the unit
- Refer to Unit Dimension figure for additional details

### CABINET

- Embossed steel cabinet
- Indoor section of the cabinet insulated with 0.5 in. dual density fiberglass insulation
- Outdoor section of the cabinet insulated with 0.5 in. weather-resistant polystyrene insulation

### INTERNAL FILTER

- Tool-less filter access
- Factory-installed 1 in. filter rack with washable filter
- Field-provided filters up to MERV 6 can typically be installed in the unit's factory filter location in lieu of washable filter, when proper duct design is applied
- If a higher resistance filter is field installed in the unit, the added resistance must be included in the external static pressure and must not exceed 0.5 in. w.c. including ductwork
- Refer to Factory Filter Size and Pressure Drop and Blower Performance tables for additional details

### VENTILATION AIR

- Units are outfitted with ventilation air openings and are shipped with the openings sealed
- Refer to Optional Ventilation Air Capability table and Optional Field-Installed Accessories section for additional details
- Check that equipment complies with all applicable building codes, laws, and regulations for its intended use prior to installation

**REFRIGERATION SYSTEM**

- Factory charged with R-410A refrigerant
- Factory sealed and tested
- Refer to Unit Electrical and Physical Data table for additional details

**Indoor and Outdoor Coils**

- Copper tube with aluminum fin coils

**High Pressure Switch**

- Shuts off unit if abnormal operating conditions cause the refrigerant discharge pressure to rise above acceptable levels

**Low Pressure Switch**

- Provides loss of charge protection by shutting off unit if refrigerant liquid pressure falls below acceptable levels

**TRANSFORMER**

- Rated for 40VA
- Factory wired for 230/240V power supply, and includes field selectable terminal for 208V
- Converts line voltage to 24V for the thermostat and control circuits within the unit

**SUPPLY AIR BLOWER****ECM Constant Torque Blower Motor**

- Electrically efficient motor for reduced electrical consumption
- Motor provides specified air volume at 0.1 in. - 0.5 in. w.c. external static pressure
- Motor is resiliently mounted for quiet operation
- Blower assembly is easily removed for servicing
- Refer to Blower Performance tables for additional details

**Electronic Blower Control**

- Dedicated blower speed taps for continuous fan, cooling, and heating operation are programmed for optimal airflow and controlled by 24V thermostat signals
- Blower speed adjustment is easily accomplished by speed tap selection
- Fixed blower delays have been selected to enhance comfort
- Refer to Blower Performance tables for additional details

**OUTDOOR COIL FAN**

- Heavy duty, fully enclosed and weatherproof
- Aluminum fan blades

**CONDENSATE MANAGEMENT****Primary Drain Pan**

- Antimicrobial protection: drain pan is injected with an antibacterial agent that destabilizes the membrane of microorganism cells, disrupting the cellular function of odor-causing mold and bacteria so that they can no longer grow or reproduce

**Overflow Protection**

- Indoor drain pan overflow switch, which monitors the condensate level in primary drain pan
- Prevents units from operating if drain clogs and water is sensed

**Secondary Drain Pan**

- Polypropylene wall sleeve base is specifically designed to direct rain water out of the building and in the event of any restriction in the primary drain will act as a redundant overflow protection

**OPTIONS & ACCESSORIES****FACTORY-INSTALLED OPTIONS****ELECTRIC HEAT**

- Mounted internal to unit cabinet
- Multiple kW sizes available; must specify the electric heating element size (0kW to 10kW)
- Optional two stage electric heat wiring on 7 & 10kW. In order to utilize this option, it will require a thermostat with single stage cooling and two stage heating
- Compatible with 208V, 230V and 240V
- Helix wound nichrome heating elements exposed directly into the air stream resulting in instant heat transfer and low element temperatures
- Cutoff limit control provides positive protection in case of excessive temperatures
- Refer to Rated Cooling & Heating Performance table for additional details

**CORROSION PROTECTION**

- Epoxy coated indoor and outdoor coils

## FIELD-INSTALLED ACCESSORIES

### WALL SLEEVES & LOUVERS

- Units must be installed with approved wall sleeve and louver accessories for safe operation and are required for all new construction installations

### WALL SLEEVES (ASLEEVE)

- Penetrates the building envelope and creates a path for condenser air intake and exhaust
- Provides a sealed connection to the unit and a secure attachment foundation for the louvers
- Larger height wall sleeves may be used on smaller tonnage equipment to maintain a uniform wall opening on the building façade
- Available in 6 in. to 12 in. depths

### WALL SLEEVE EXTENSION (ASLEEVEXT4)

- Option provides an additional 4 in. of depth to the wall sleeve, for a maximum depth of 16 in.

### LOUVERS

#### Polypropylene Louvers (ALVRP)

- Constructed from durable, corrosion-resistant plastic
- Available in four standard colors

#### Aluminum Louvers (ALVRAL)

- Constructed with 6063-T6 grade aluminum
- Available in anodized clear coat, primer (to be painted in the field), standard paint colors and custom colors with paint matching\*

#### Impact-Resistant Aluminum Louvers (ALVRALC)

- 29" and 33" impact-resistant louvers are impact and wind load certified up to 186 MPH, risk categories III and IV, and wind exposures C and D (FBC Notice of Acceptance number 18-0522.03)
- Constructed with 6063-T6 grade aluminum
- Available in anodized clear coat, primer (to be painted in the field), standard paint colors and custom colors with paint matching\*

### CRANKCASE HEATER (ACASE841)

- Warms compressor crankcase to limit migration of liquid refrigerant back to compressor during off cycle
- Available for models with scroll compressors
- Refer to Crankcase Heater table for additional details

### SHORT CIRCUIT CURRENT RATING KIT (ASCCR)

- Provides 200kA of SCCR protection
- Refer to SCCR Accessory table for additional details

### FILTERS

- Field-supplied MERV 6 filters (as required by ASHRAE 62.2) can typically be applied at the unit's factory filter location

### VENTILATION DAMPERS

- Optional field-installed
- Check that the equipment complies with all applicable building codes, laws, and regulations for its intended use prior to installation

### MOTORIZED DAMPER W/ CONTROLLER

#### (AVADAMP1)

- Utilizes a ventilation air control module that is field programmable to assist with meeting ASHRAE 62.2 requirements
- Once programmed with values for ventilation air amounts, the control module opens the damper in response to thermostat inputs and monitors the run time
- Upon meeting the ventilation air needs, the control module will close the damper until the start of the next cycle
- If, during an observation period it is determined that thermostat operation alone may not provide the desired ventilation air, the control module can independently operate the unit's indoor blower, in continuous fan mode, and open the damper to aid in providing ventilation air needs

### MOTORIZED DAMPER W/ FIELD-SUPPLIED RELAY (AVADAMP2)

- Opens ventilation air damper during indoor blower operation and closes during blower off periods
- Requires field-supplied and installed current sensing relay to detect indoor blower operation

### HYDRONIC COIL

- Option is available on OMCE models (without electric heat)
- Unit may be adapted to include a field-supplied hydronic/hot water coil

### THERMOSTAT

- Required for all installations (field-supplied)
- Units are individually controlled with conventional 24V thermostat
- Thermostat must be capable of:
  - Single stage cooling and single stage heating (3 and 5 kW single stage electric heat)
  - Single stage cooling and two stage heating (7 and 10 kW two stage electric heat)
- Refer to Unit Electrical and Physical Data table for additional details

\* Certain exclusions apply. Refer to louver manufacturer's literature and warranty documentation.

\* Dimension B represents the height of the optional front return air duct opening

\* Provisions must be made to properly drain the primary and secondary drain pan.  
Piping the condensate to an inside drain is required.

## MINIMUM CLEARANCES

### Accessibility Clearances

The front of the unit must be accessible for service. A minimum clearance of 30" in front of unit is required for service.

If the unit is enclosed, a door or access panel aligned with the front of the unit is the preferred method of providing access. The door or access panel opening must be a minimum of 30" wide (centered on the unit) and be as tall as the unit.

If a return duct is not installed, in order to provide adequate return air, the minimum clearance required between the front of the unit and the door or access panel is 4" for 43" tall cabinets and 5" for 48" and 56" tall cabinets.

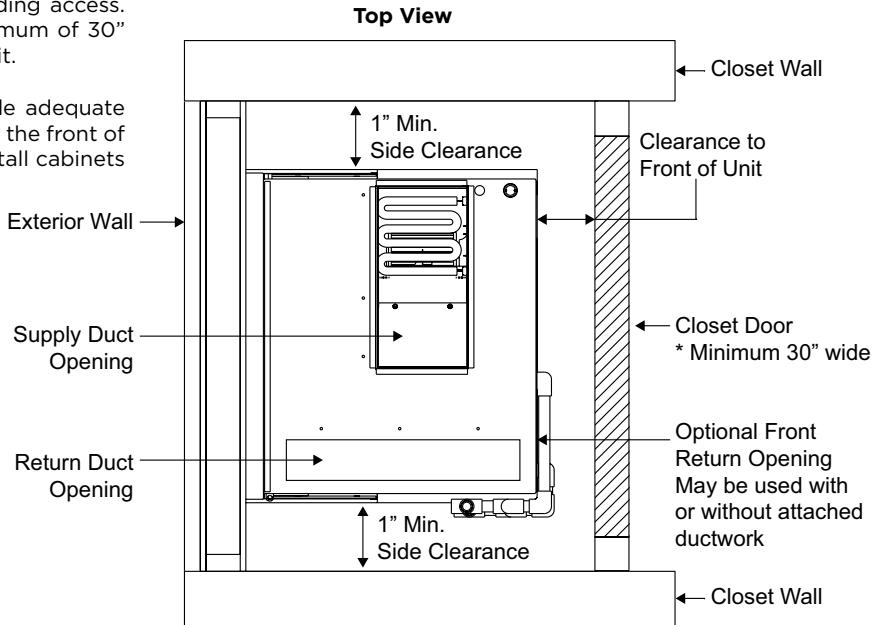

#### IMPORTANT

The unit must be installed with approved wall sleeve and louver accessories for safe operation. Improper installations could result in property damage, personal injury, or death.

### Supply Duct Clearances

Minimum Clearances to Combustible Materials [1]		
Front	Sides	Top
0"	0"	0"

[1] Accessibility clearances take precedence.

## OUTDOOR SOUND RATING & CABINET AIR LEAKAGE

*MCE4-11-301*P											
*MCE4-11-361*P											

Performance based on factory-provided washable filter installed in the unit. If a higher resistant filter is field installed in the unit, the added resistance must be included in the external static pressure and must not exceed 0.5 in. w.c. including ductwork.

## OPTIONAL VENTILATION AIR CAPABILITY

Figure below shows the amount of ventilation air as a function of unit tonnage and return duct static pressure. Data is pending final testing along with low ambient operation.

## BLOWER PERFORMANCE

- Performance based on factory-provided washable filter installed in the unit.
- If a higher resistance filter is field installed in the unit, the added resistance must be included in the external static pressure and must not exceed 0.5 in. w.c. including ductwork
- Refer to Factory Filter Size and Pressure Drop table for additional details

N/A: Do not operate unit using this blower speed at this external static pressure.

\* As shipped speed for Cooling operation. Blower speed must be field adjusted to Speed Tap 3 for higher duct static applications.

\* As shipped speed for Heating operation. Blower speed must be field adjusted to Speed Tap 5 for higher duct static applications.

## BLOWER PERFORMANCE CONTINUED

- Performance based on factory-provided washable filter installed in the unit.
- If a higher resistance filter is field installed in the unit, the added resistance must be included in the external static pressure and must not exceed 0.5 in. w.c. including ductwork
- Refer to Factory Filter Size and Pressure Drop table for additional details

N/A: Do not operate unit using this blower speed at this external static pressure.

\* As shipped speed for Cooling operation. Blower speed must be field adjusted to Speed Tap 3 for higher duct static applications.

\* As shipped speed for Heating operation. Blower speed must be field adjusted to Speed Tap 5 for higher duct static applications.

## BLOWER PERFORMANCE CONTINUED

- Performance based on factory-provided washable filter installed in the unit.
- If a higher resistance filter is field installed in the unit, the added resistance must be included in the external static pressure and must not exceed 0.5 in. w.c. including ductwork
- Refer to Factory Filter Size and Pressure Drop table for additional details
